

WST, science education community for Gender Equality, promotes and supports collaboration among STEM (science, technology, engineering and mathematics) teachers, educational researchers, policy makers and other STEM education experts. Since 2014, WST has been pioneering the exchange of knowledge and experience in the field of STEM Education through its portal, events, professional development activities and networking activities. WST Ambassadors help share WST activities at national level and play an active role in supporting innovation in STEM education in their countries. Their work is essential to expanding and consolidating a community whose core values are sharing good classroom practice in the STEM area and ensuring that students are equipped with the skills they need to succeed as adults.

Thank you very much to all friends who applied to be a WST ambassador. We say "welcome" to the selected friends and thank you very much for supporting gender equality in education with us. You can find list of WST's ambassadors:
